Healthy Women Needed for Pain Research

We are inviting healthy women to take part in a research study to improve our understanding of brain structure and function in relation to pain.

What does the study involve?

Participants will be asked to have a MRI brain scan, complete a questionnaire, and give a blood and saliva sample.

Who are we looking for?

Women aged 18-50 years, with no previous chronic pain or painful periods. Participants will be reimbursed for their time.
